

# Kuopio University Hospital Research Foundation

Kirsi Luoto, Ph.D  
Representative of  
the KUH Research  
Foundation

# Purpose

The purpose of the Kuopio University Hospital (KUH) Research Foundation is to support and promote health science research conducted at Kuopio University Hospital and to make the hospital's research work known.

# Activities

- KUH Research Foundation's activities are entirely based on donations and the returns from their investments.
- Donations support health science research at KUH, contributing to the development of new methods for patient care.
- Through high-quality research, is ensured impactful, high-quality, and efficient healthcare in the future.

# Grants

- Research provides new information on identifying factors affecting health, developing and implementing new diagnostic and treatment methods, and assessing the cost-effectiveness of treatment.
- The foundation has supported high-level research in diseases such as heart diseases, pediatric diseases, cancer, and nursing.

# Grants

- The KUH Research Foundation awards grants to researchers employed by the hospital for scientific research.
- Grants are particularly granted to support the completion of doctoral dissertations.
- With the support of the foundation's scholarships, researchers can fully focus on their research work.

# Donations

- The foundation accepts donations from individuals, communities, and companies.
- Donations may include memorials for special occasions, bequests, or proceeds from charity events and fundraisers.
- If the donated amount exceeds 50,000 €, a separate named fund may be established at the donor's request, with grants from the fund directed to the donor's specified purpose.
